

JOHNMARK ARUMULLA

+91-8142421367 | johnarumulla@gmail.com | LinkedIn | Portfolio | Hyderabad, India

PROFESSIONAL SUMMARY

Frontend Engineer with over 2 years of professional experience designing, developing, and optimizing high-performance user interfaces and responsive web applications. Expert in **JavaScript (ES6+), React.js, jQuery, HTML5, and CSS3/Bootstrap**, with a proven track record of translating complex Figma/Adobe XD prototypes into pixel-perfect, accessible digital products. Backed by advanced C-DAC computing training, combining strong visual UI/UX sensibilities with an engineering mindset for frontend performance optimization, data rendering, and smooth API integration.

TECHNICAL SKILLS

- **Frontend Engineering:** JavaScript (ES6+), React.js, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS
- **UI/UX & Design:** Figma, Adobe XD translation, Responsive Web Design, Cross-Browser Compatibility, Mobile-First Architectures
- **Data Integration & Performance:** RESTful APIs, JSON, Core Web Vitals Optimization, Code-Splitting, Asset Lazy Loading
- **Tools & Infrastructure:** Git, Docker, Linux, Shell Scripting, Custom WordPress Customization (Theme/Plugin UI), Bluehost
- **Database & Logic Foundations:** MySQL (Frontend Query Optimization), PostgreSQL, Clean Code Practices, Agile Methodologies

PROFESSIONAL EXPERIENCE

Junior Software Engineer

Voola Software Solutions Pvt. Ltd. | Hyderabad, India | *Sep 2025 – Present*

- **Frontend & UI Development:** Architect and build interactive, highly accessible, and mobile-first user interfaces using JavaScript (ES6+), React.js, and Bootstrap.
- **Performance Optimization:** Refactored inefficient frontend rendering logic and optimized application queries to cut page loading and data execution times from 45 seconds to 2 seconds (95% speed leap).
- **Component Customization:** Programmed modular, custom WordPress theme and plugin layouts from scratch using semantic code structures to match strict client branding parameters.
- **Web Vitals Engineering:** Implemented technical frontend optimizations, including aggressive code-splitting, resource caching, and asset compression, to maximize Google Core Web Vitals scores.
- **Full-Cycle Deployment:** Managed asset migration, domain routing, and platform staging environments, ensuring zero layout shifts during live deployment releases.

Trainee — HPC & AI

C-DAC Bangalore | Bengaluru, India | *Mar 2025 – Aug 2025*

- **UI-Driven Project (Ocean Cleanup System):** Developed a tracking platform layout utilizing Python data pipelines to parse heavy spatial data streams into readable visual structures.
- **Optimization Analysis:** Systematically profiled code bottlenecks to optimize ingestion scripts by 80 percent, ensuring smooth data state transitions across application views.
- **Distributed Logic:** Leveraged high-concurrency computing structures to manage heavy algorithmic calculations, turning complex analytical math into seamless, readable outputs.

Web Development Intern

Voola Software Solutions Pvt. Ltd. | Hyderabad, India | *Jan 2024 – Jan 2025*

- **Design-to-Code Translation:** Converted high-fidelity UI visual mockups from Figma and Adobe XD into pixel-perfect, clean, and cross-browser compliant web structures.
- **Interactive UI Architecture:** Built dynamic layout widgets, customized navigation frameworks, and automated user input validation forms to enrich client web applications.

- **SEO Implementation:** Integrated on-page technical SEO architectures and structured microdata (Schema markup) to enhance user discovery and layout readability for search engines.

TECHNICAL PROJECTS

Wekeza — Fintech Investment Platform | Live Project

- **Technologies Used:** JavaScript (ES6+), React.js, RESTful APIs, Mobile-First Responsive Design
- Engineered the complete multilingual UI for an international investment and financial literacy platform catering to the African diaspora community.
- Integrated complex REST API endpoints to beautifully map, manage, and render live stock market data feeds while guaranteeing fluid execution over low-bandwidth connections.

Chimcare — Commercial Service Infrastructure | Live Project

- **Technologies Used:** JavaScript, PHP, Bootstrap, Dynamic Form Engineering, Performance Testing
- Developed and styled a multi-location service engine operating across 15 states in the US, handling thousands of monthly booking interactions.
- Designed an intricate multi-step dynamic client checkout/booking form with optimized client-side validation, significantly reducing drop-off rates and increasing lead generation.

AI for Ocean Cleanup Visualizer (C-DAC) | GitHub Repository

- **Technologies Used:** Python, NumPy, Pandas, Data Visualization Pipelines
- Built a computation dashboard tracking oceanic pollution patterns, translating heavy spatial arrays into structured, real-time map views.

EDUCATION

- **B.Tech, Computer Science and Engineering** | Audisankara Institute of Technology, AP | 2019 – 2023 | CGPA: 7.1/10.0

CERTIFICATIONS

- **Meta Front-End Developer Professional Certificate** | Coursera | July 2024
- **SOAR – AI for Educators** | Microsoft | December 2025
- **Full Stack Web Development** | Udemy | January 2023
